It takes a drop of water nearly 400 years to travel from the headwaters of Lake Superior to the edge of Lake Ontario. Along the way, the water passes by towering cliffs dotted with early Native American pictographs, over giant prehistoric sturgeon lurking among thousands of shipwrecks and past nearly 40 million people who live along the more than 10,000 miles of coastline. As part of the exhibition "WaterWorks: Soak Up the Science," The Alden B. Dow Museum of Science and Art will screen the film "**Mysteries of the Great Lakes**" on Sunday, February 7 at 2 pm in the Lecture Room of Midland Center for the Arts, 1801 W. St. Andrews Rd., Midland. Cost is \$5 per person. For more information call MCFTA Ticket Office at (989) 631-8250 or (800) 523-7649 or [www.mcfta.org](http://www.mcfta.org).

"This film is a wonderful addition to our 'WaterWorks' exhibition programming," says Bruce Winslow, Museum Director. "Audiences will discover the secrets of the Great Lakes in a dramatic journey through some of the most spectacular scenery in the world." A Science North production originally presented in IMAX Theaters, it features the music of Canadian recording artist Gordon Lightfoot.

The Alden B. Dow Museum of Science and Art (ABDM) celebrates discovery, creativity and individual expression through art, science and the interplay between them. Exhibitions in the Museum, classes at the Museum School, multiple outreach programs, a permanent collection and various special events are all components in the ABDM programming.
