Happy New Year!

Midland Center for the Arts welcomes 2012 with a collection of exhibitions that's OUT OF THIS WORLD when **Space. Sky. Sci-Fi.** lands at the Alden B. Dow Museum of Science and Art in January!

Nationally-touring exhibits celebrate the beauty and science of the upper atmosphere, and the determination of those who explore it.

Visitors will discover:

- The beauty and allure of the Solar System's four giant planets
- Famous costumes from popular TV shows and movies
- Stunning photographs of iconic aircraft
- The power and majesty of clouds when viewed from above
- The intrigue of aviation artifacts

To learn more, including details on the exhibitions, special activities, and downloadable images, click here:
